

This Addendum #1 to Request for Proposals (“RFP”) # 2020-02 from the Umatilla and Morrow Radio and Data District (“UMRDD” or “the District”) provides a change to the requirements of the RFP.

A change has been made to the type of State of Oregon contractor’s license required by proposers. Also, because one location is in the State of Washington, proposers must also have licensure in that state. Therefore, the following portions of the RFP will be changed as described below:

- In Section 4.8.1, the third paragraph shall now read as follows:
“Proposers shall possess at the time of bid submittal and maintain throughout the work period both: i) a valid State of Oregon Electrical Contractor License and ii) a valid State of Washington Electrical Contractor’s License or Telecommunications Contractor License.”

- In Section 5.7, the fourth subpoint shall now read as follows:
“A scanned copy of the Proposer’s current licenses from the States of Oregon and Washington.”

Only the specifically-noted paragraphs or subpoints are changed by this Addendum.

Other paragraphs or subpoints of the affected Sections are not changed and all other requirements and conditions of the RFP, including the closing date and time, remain unchanged.
